

Elite Residential Door

When selecting a garage door in the past, you have always had to choose between wood and steel. Finally, there's a garage door with the strength of steel, the beauty of wood and the drawbacks of neither. The "ELITE" utilizes its technologically advanced molded wood fiber to provide you with that look of authenticity and yet enables the door to withstand even the toughest climactic conditions.

**LIFETIME
WARRANTY**

- Embossed, raised panel face may be stained or painted, offering endless possibilities to match the decor of your home.
- Strong composite face is especially resistant to denting.
- The Elite wood fiber technology is made to withstand the toughest climactic conditions without warping, swelling, rusting or cracking.
- Tongue and groove joints between sections provide a snug, weathertight seal.
- LVL rail construction provides superior strength and durability.
- Environmentally safe, CFC-Free, expanded polystyrene insulation.
